SIMD vs Manual

The graph illustrates the performance of different multiplication methods as the size of the data increases. The 'SIMD Mult/Reduction' method (orange line) achieves the highest performance, reaching a plateau of approximately 1,800 MegaOperations/Sec. The 'SIMD Mult' method (blue line) also shows significant performance, reaching about 600 MOPS. In contrast, the 'Manual Mult' (red line) and 'Manual Mult/Reduction' (green line) methods maintain much lower performance levels, staying below 300 MOPS throughout the range of sizes tested.
